

exploring & collecting history online

— science, technology, and industry

<http://echo.gmu.edu>

Since 2001 the Echo project has collected and presented the recent history of science, technology, and industry.

For researchers and amateurs alike, Echo maintains the Research Center, the most comprehensive gateway to history of science, technology, and industry websites.

grant announcement

The Echo project is currently accepting applications for \$1000 seed grants to fund current projects involving the online collection of the history of science, technology, and industry.

Please submit a proposal of no more than 500 words along with a C.V. to echo@chnm.gmu.edu by 1 April 2007.

workshops & consultancies

Echo offers free private consulting and group workshops to individuals and institutions.

We consult for projects that collect materials, while our workshops are open to anyone creating a Web-based project in the history of science, technology, or industry.

Our consulting services are tailored to the budget, scope, and focus of your project and cover the following:

- developing a project plan
- designing a digital history website
- devising marketing strategies

We will hold our next workshops in New York City in April 2007 and Washington, DC in June 2007. For details, please visit:
